

Revit®

Collaboration Tools

Autodesk® Revit® is a Building Information Modeling (BIM) tool, which can be used by more than one person working on a new project. This is an important feature in collaboration within a project, between projects, and with other users, firms, and disciplines.

The objective of the Autodesk® Revit® Collaboration Tools class is to enable students, who have a basic knowledge of Autodesk® Revit®, to increase their productivity while working with other people on a team, either in the same firm or other firms as well as with other disciplines. It also covers linking Autodesk Revit® files and linking or importing other CAD files. Practices are available for each of the primary disciplines covered by Autodesk® Revit® Architecture, MEP, and Structure.

COURSE OF FOCUS:

- Set up project phasing
- Create and display a variety of design options
- Use groups
- Link Autodesk® Revit® files
- Use multi-discipline coordination including Copy/Monitor and Coordination Review
- Import and export vector and raster files including exporting Autodesk® Revit® models for energy analysis
- Understand, use, and setup worksets

PREREQUISITES:

- Students should be comfortable with the fundamentals of Autodesk® Revit® as taught in Autodesk® Revit® Architecture, MEP, or Structure Fundamentals. Knowledge of basic techniques is assumed, such as creating typical elements as well as copying and moving objects, creating and working with views, etc.

Additional Information:

- Instructor Led Training
- 1 Day, 8:30 am – 4:30 pm

Authorized Training Center:

1128 Roosevelt Avenue
Suite 100
York, PA 17404

Customized and on-site training available upon request.
