

# Revit®

## For Project Managers

The Autodesk® Revit® software is a powerful Building Information Modeling (BIM) program that works the way Architects and Engineers think. The software streamlines the design process with a central 3D model. Changes made in one view update across all views and on the printable sheets. This course is designed to give you an overview of the Autodesk® Revit® (Architecture, Structure, and MEP) functionality especially as it pertains to Project Managers.

### COURSE OF FOCUS:

- Understand the purpose of Building Information Management (BIM) and how it is applied in the Autodesk® Revit® software
- Navigating the Autodesk® Revit® workspace and interface
- Working with the basic modifying and modeling tools
- Troubleshooting elements in projects
- Various viewing tools including creating sections
- Working with sheets for plotting
- Exporting files to CAD Formats and DXF (the Autodesk® Design Review software)
- Working with schedules
- Linking and importing CAD files and Autodesk® Revit® models into projects
- Using Worksets in a collaborative environment
- (Optional) Creating details

### PREREQUISITES:

- N/A

### Additional Information:

- Instructor Led Training
- 1 Day, 9 am – 4 pm

### Authorized Training Center:

1128 Roosevelt Avenue  
Suite 100  
York, PA 17404

### **Customized and on-site training available upon request.**
